# ABOUT US

## DESIGN DOORS AND WINDOWS, JUST DRAG & DROP

Window Craft was Mainly aimed at the window industry, it created the “new world of windows industry software”.

According to the different requirements of different door and window enterprises for window structure, a set of automatic material calculation and optimization system is developed.

We have established a good and stable customer relationship with many well-known enterprises at demestic and abroad.

Window Craft gradually formed a strong talent and technology advantages. In particular, we have developed a rapid drawing, rapid material calculation system, and two major formulas. It solves the two big pain points of high cost and high error rate of manual calculation. It provides a set of optimization software for window enterprises to get through the intelligent calculation software of dealers and manufacturers.

# DO YOU WANT SOLUTIONS

# FOR YOUR UPCOMING BUSINESS?

Window Craft has a wide range of applications.

To meet with different kind of customers with different requirement, depending on the material they used, we added special features for each material type.

So it could be used for designing and making uPVC window door, aluminum window door, and wood window door.

Almost of all platform is supported, less is more

With experience of more than 10 years, window craft team delivers solutions to windows and doors industry all over the world.

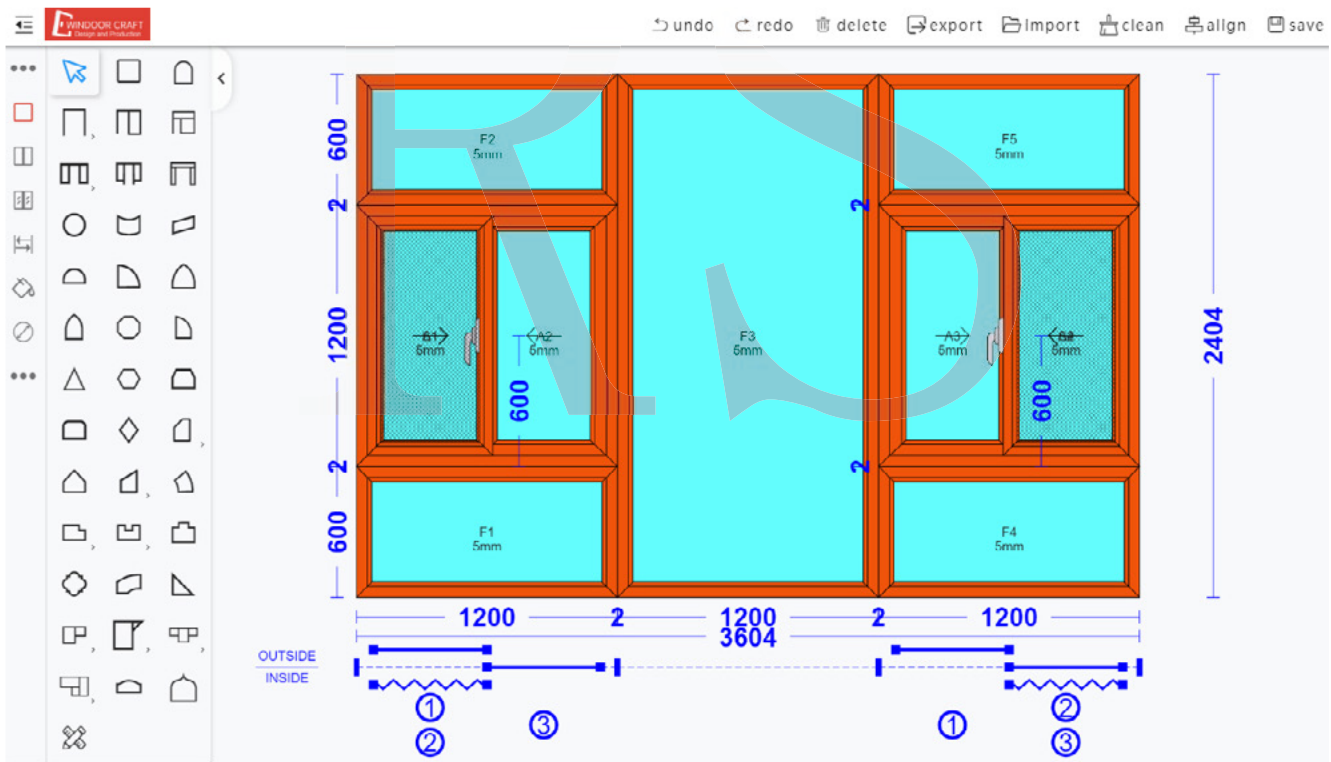

# MAKE THE DESIGN EASY

## JUST 3 EASY STEPS

### SELECT & CLICK

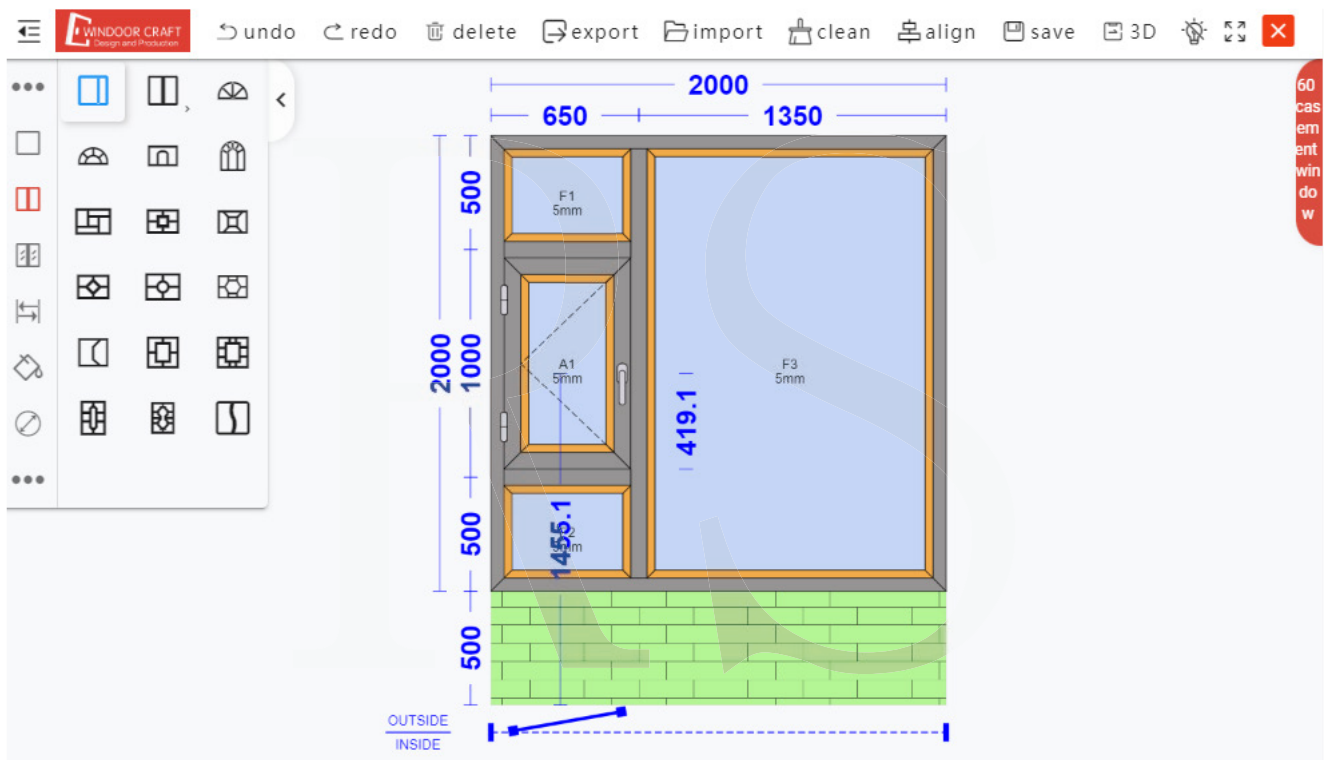

Our software is very easy to use, we could choose the design tools by selecting and clicking. A wide range of rectangular and non-rectangular shapes design, mullion can be rotated toward any direction, almost any shape can be customized easily

# DRAG & DROP

We could drag and drop any component to create a unique frame, mullion, sash, and more-even adjust item sizes to find the perfect fit.

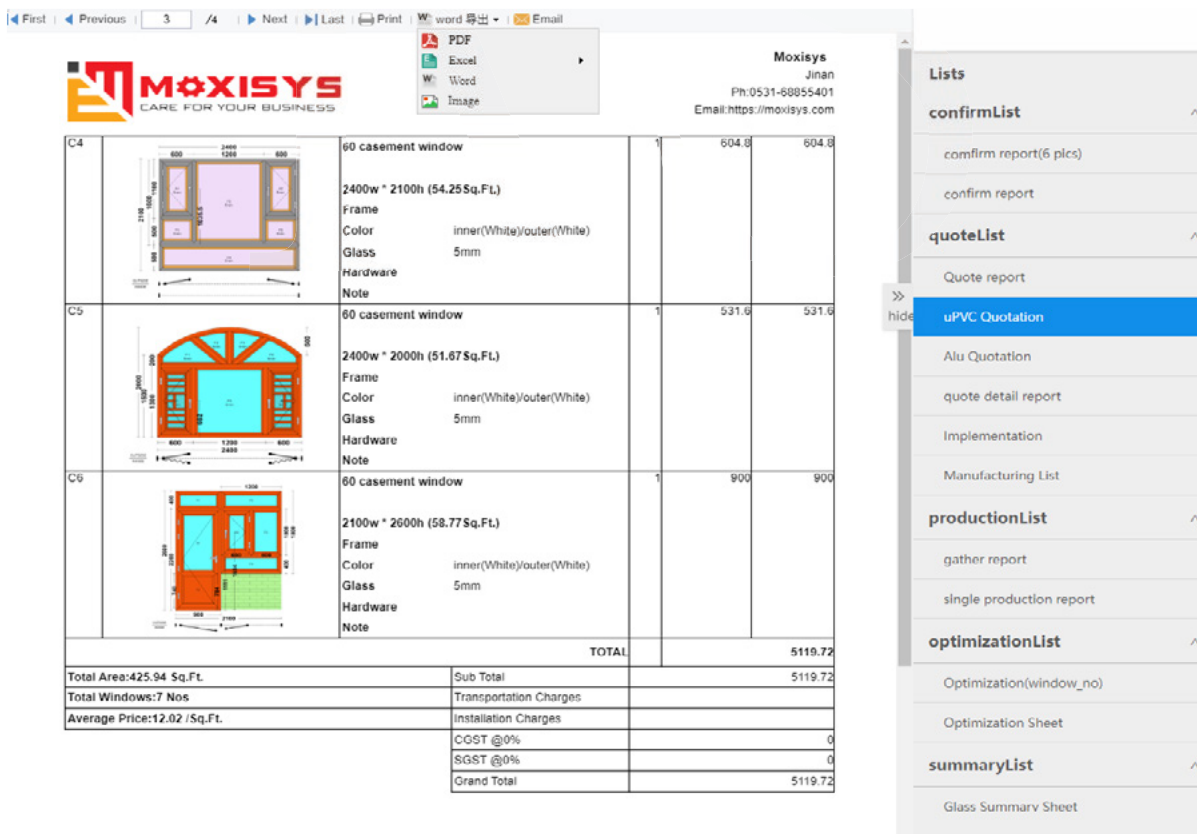

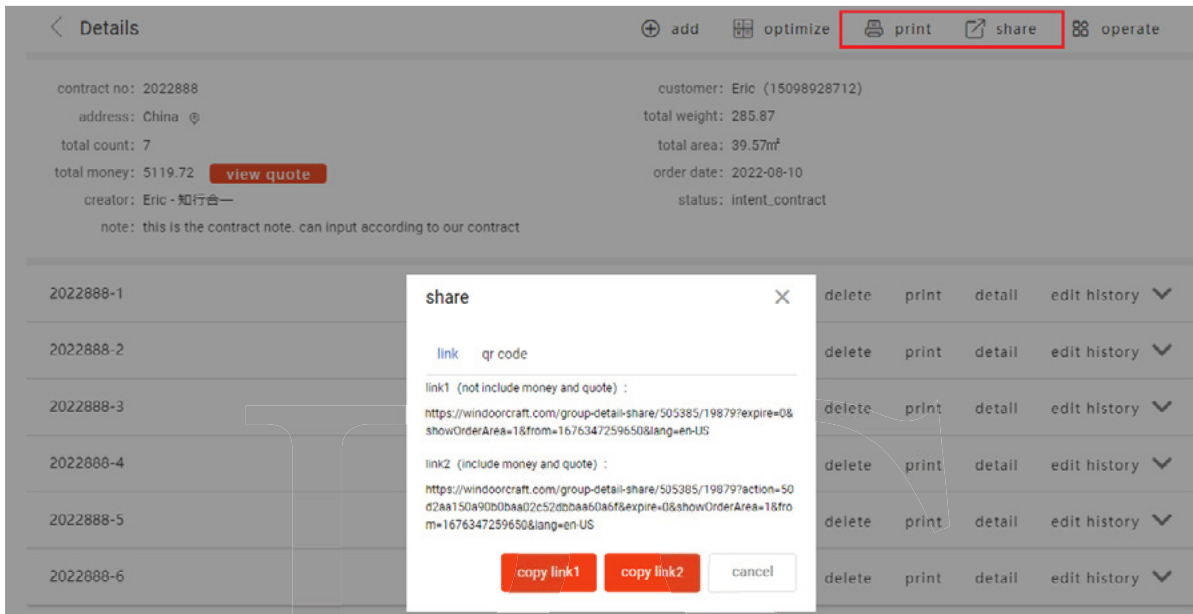

Use the mouse to draw any size of windows, drag the left mouse button horizontally or vertically to create corresponding mullions, then add a sash. finish designing windows and doors just in a few seconds.

# PRINT & SHARE

Use our printing feature to generate a range of professional reports including client's quotations, dealer's price and bill of materials.

You can export it to PDF file or share link to your customers directly.

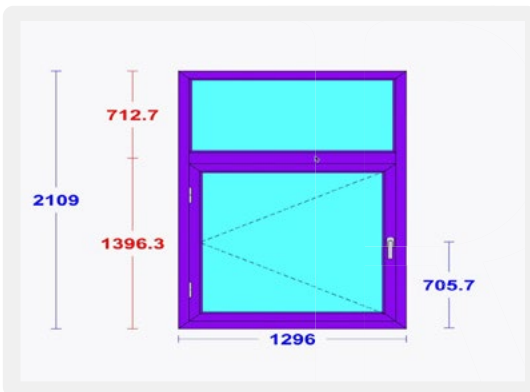

# ALMOST EVERYTHING CAN BE DRAGGED

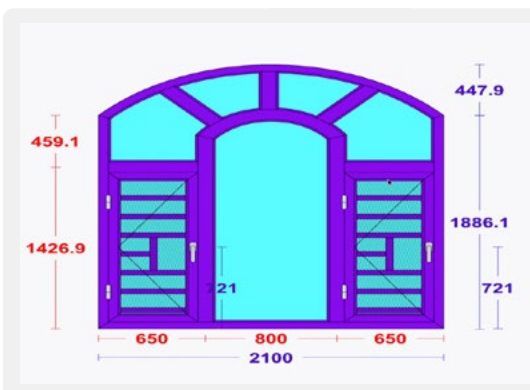

## DRAG FRAME

Drag frame to transform shape on the fly, any edge of frame can be dragged to change size or shape of frame. it's so easy to operate, even child can get a hang of it very quickly.

## DRAG MULLION

It can be dragged to arc shape on the fly, even can be rotated freely. fenestration can be tweaked easily by this way.

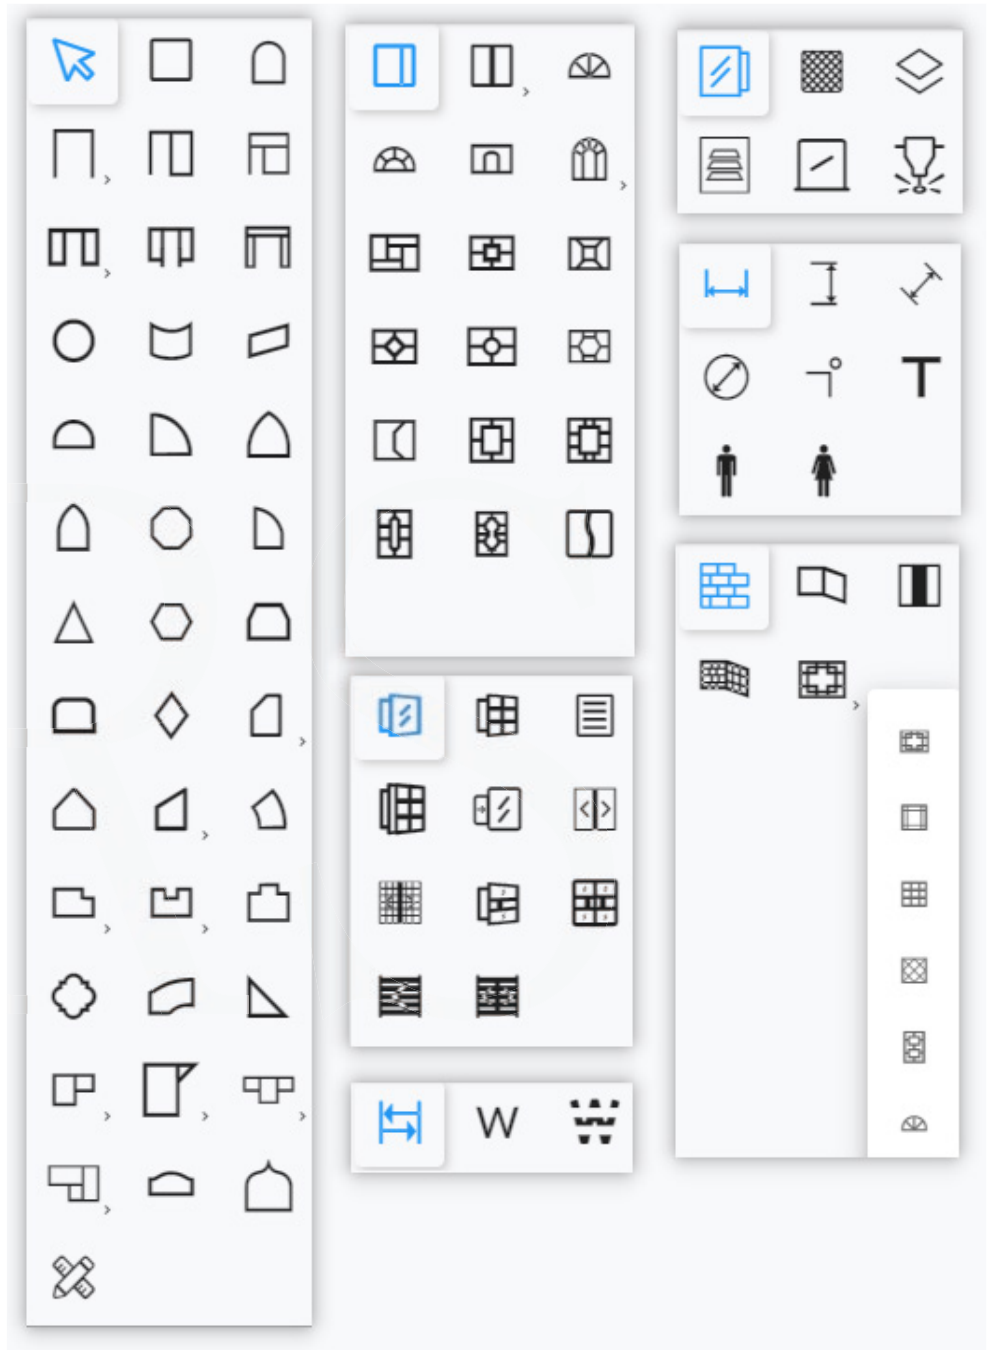

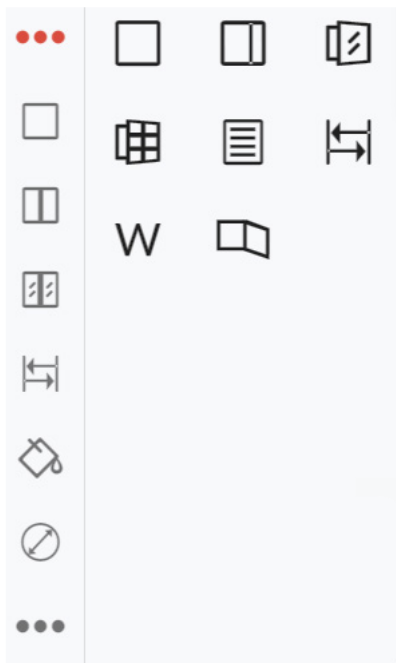

## DRAG HANDLE

Drag frame to transform shape on the fly, any edge of frame can be dragged to change size or shape of frame. it's so easy to operate, even child can get a hang of it very quickly.

# 8 TOOLS KIT MORE THAN 100 TOOLS

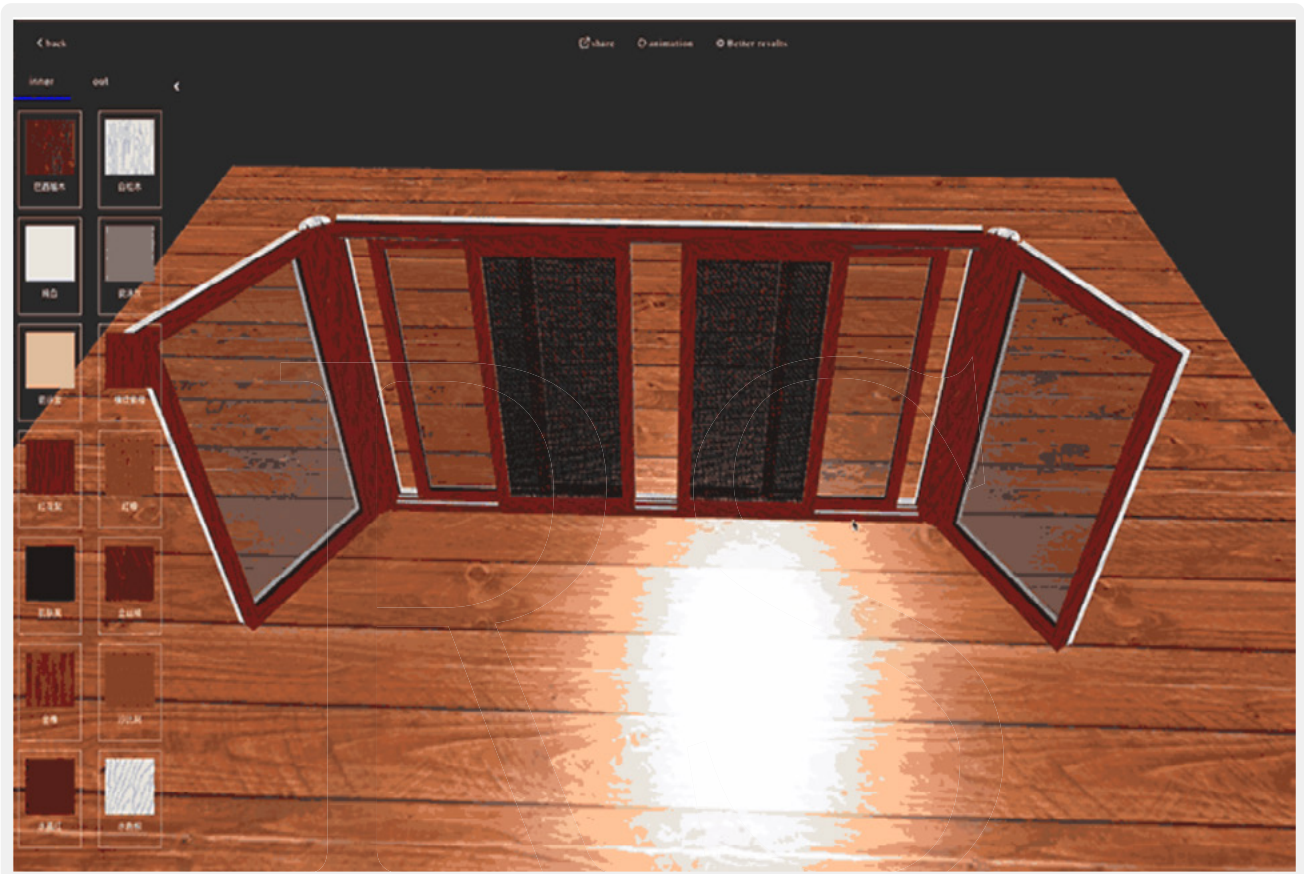

MAKE DESIGN MORE EASIER

# GENERATE 3D MODEL AUTOMATICALLY

WHAT YOU SEE IS WHAT YOU GET, STUNNING DESIGN CAN BE CREATED EASILY

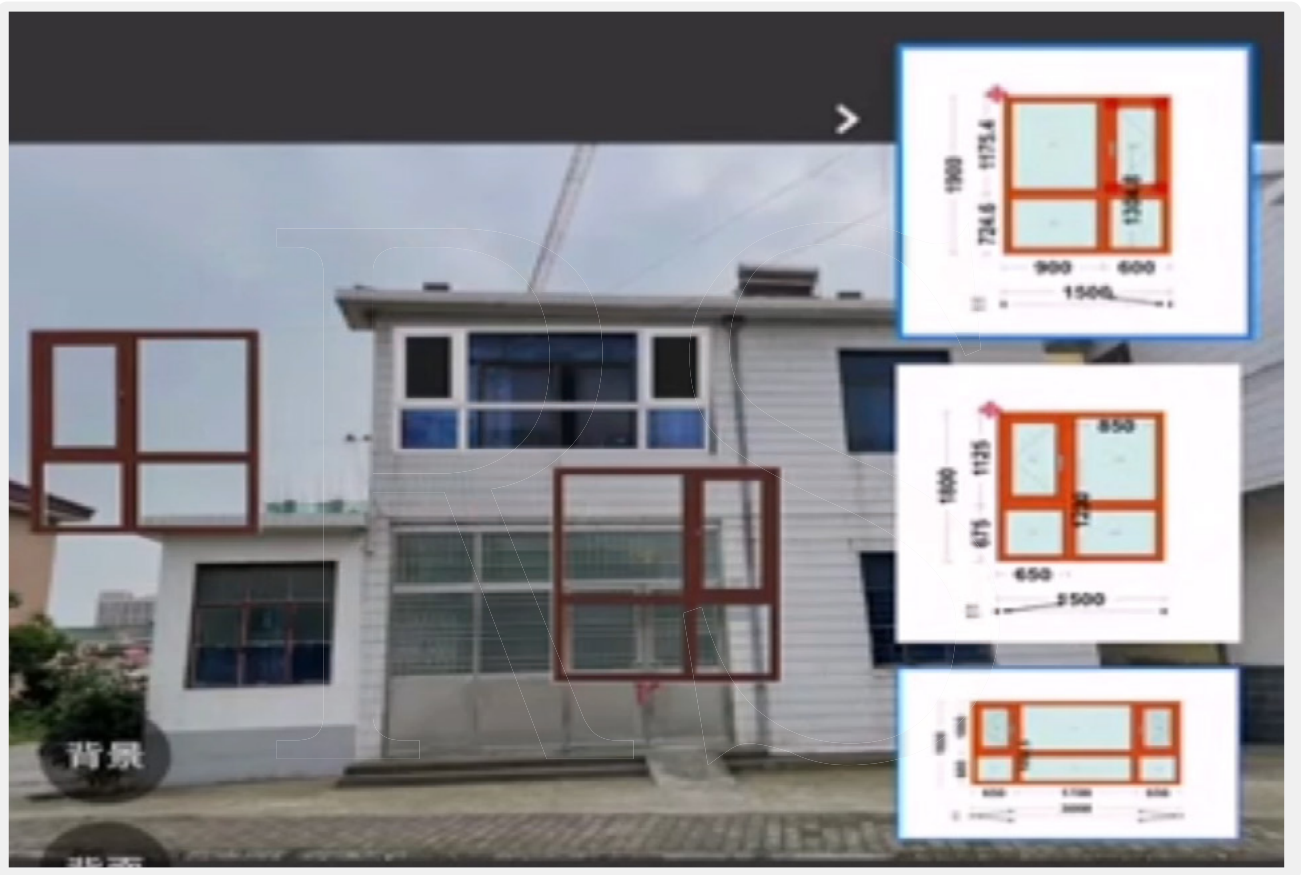

# REAL PHOTO MATCH

LET YOUR CLIENTS GET WHAT HE SEE

we could take some real pictures from our client's site, upload to the software and match our designed windows to show our clients the real effect.

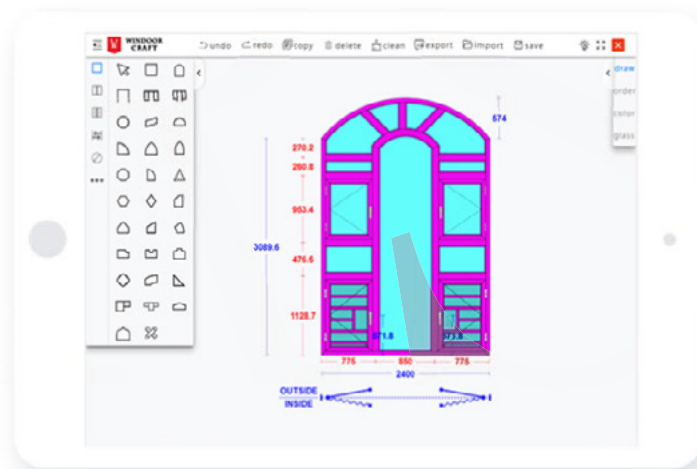

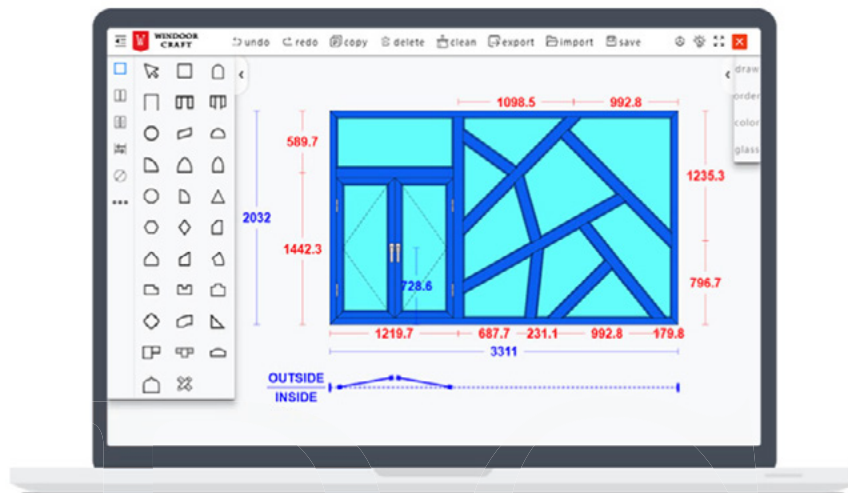

Outstand among your competitors!

# ONLINE WORKING

CREATE ANYWHERE, ANYTIME

We cover all platforms with full synchronization between them!

After drawing the windows & doors, we could send the order or project to our clients online.

1. clients could see the window designs and their details.
2. Clients could see the 3d views.
3. Clients could see the quotation.
4. Clients could confirm and sign online.

Fullfill our clients anytime, save cost, outstanding among your competitors!
